

# **THE WORLD CAN'T WAIT DRIVE OUT THE BUSH REGIME!**

**STATEMENT FROM**

**Ed Begley Jr.**

for World Can't Wait Press Conference

JANUARY 26, 2006

---

**MY WONDERFUL REPUBLICAN FATHER** always asked what I was FOR, not just what I was against. "I understand what you're opposed to," he'd say, "But, what is your alternative?"

**WELL, I BELIEVE THERE IS AN ALTERNATIVE** to the current war on terror that this administration has waged for the past 3 years.

**IT IS THE SAME ALTERNATIVE** that I suggested at a press conference in October of 2002, months before the invasion of Iraq began.

Take those same billions of dollars and invest in HUGE Federal subsidies for the following EXISTING, OFF-THE-SHELF, technologies:

Solar Panels	Wind Turbines
Electric Vehicles	Hybrid-Electric Vehicles
Natural Gas Vehicles	Home Insulation
Public Transportation	Bike Lanes

In a very short time, we will **ELIMINATE** our need for Middle East oil and **ELIMINATE** the funding for Bin Laden, Al Qaeda, and other terrorist organizations.

As the World Can't Wait Call states:

"... Your government suppresses science that doesn't fit its religious, political and economic agenda, forcing present and future generations to pay a terrible price."

**I URGE EVERYONE TO PARTICIPATE** in the nationwide protests when Bush makes his State of the Union Message—to drown out his lies and demand Bush Step Down and Take Your Program With You—on Jan. 31 and in Washington DC on February 4th.

Thank you.

Ed Begley, Jr.
