

THE WORLD CAN'T WAIT DRIVE OUT THE BUSH REGIME!

STATEMENT FROM

Edwin Ellis

Board Member, Veterans for Peace, L.A.*

January 26, 2006

WE HAVE ENTERED A DARK PERIOD in our history where our government has become more of an enemy than any threat from outside our country. Yes 9/11 was a great loss to all of us yet the continued misappropriation of our taxes to support questionable military objectives robs the lives from citizens who die early each year from poor health care, lack of adequate heating in winter, lack of neonatal care for expectant mothers, pollution from our continued dependence on fossil fuels, and the lack of good jobs for our inner city youths. The loss of life in these areas numbers in the millions each year, and dwarfs any terrorist event that has occurred to our country.

IT IS PROFOUND THAT WE THE CITIZENS have greater vision, greater compassion and greater leadership abilities than those in positions of leadership in this country. The recent indictment of Jack Abramhoff for bribing members of congress is not a recent revelation it is business as usual in all levels of our government, and shows how disenfranchised we all are in this country. Unless we have enough money to gain the attention of our leaders, we become bystanders to the processes of our government. Yes we need to call for the impeachment of President Bush but the greater vision is to call for a complete change in leadership in this country.
